THE EMERGING LEADER

LEADERSHIP MECHANICS FOR THE EMERGING NEW LEADER

Leadership Mechanics has been developed **for the new leader**. It is focused on the fundamental aspects of leadership, such as motivating, conflict resolution, uniting, building, training, mentoring, communication and retaining an elite team. These key issues are at the core of reaching the organization's direction/destination which is a formidable task for the inexperienced leader. It is for these reasons that we have developed Leadership Mechanics.

Leadership Mechanics is applicable for any leader aspiring to improve the tactical aspects of managing an operation. The information has been derived from real world experiences and is presented through lecture, role play and open forum dialogue.

Key Components:

- Key Provide leadership **mechanics** / tactics leading to high performance results
- Aspects of creating a breakthrough in production, recruiting and retention
- Increase levels of respect from those being directed
- Confidence building
